A Special Science Exhibition in the Neighbourhood

By Our Correspondent

Vasantham, a special school for the mentally challenged at Mogappair East is all set to conduct 'Arivom Ariviyal 2017', a challenging science exhibition, from March 1 to 4 on its campus on Electricity Board Road. The demonstrations being done for the past week by the special children, as part of their rehearsals, has caught many a visitor by surprise. It also stands testimony to the enormous potential these special children have and how it could be channelised in the right direction through constant guidance by trained staff.

According to Alli Murugesan, founder and director of the special school, this year they expect more than 100 demonstrations to be done by the children which will focus on the theme Health and Hygiene. Different systems of human body will be analysed through these practical demonstrations during the exhibition. Knowledge about various diseases and its causes would be disseminated to the audience, she added.

"Preventive measures for a healthy life through our traditional medicines will be among the big take-aways for visitors to exhibition," she said. "We don't

train the students separately for the exhibition. They have been getting trained to know the scientific aspects of human life throughout their education here. We are going to exhibit only what they have learnt and worked upon in the everyday learning process," she added.

"We come up with different themes and this year's theme will be cherished by all the kids as they should know much about them. Last year, a similar exhibition attracted more than 2,000 visitors including more than 1,000 students from nearby schools. In fact despite heavy rains we had many people," she

added.

Dr. AR Vijaykumar Ilango, managing director, Raj Nursing Home, Mogappair will inaugurate

the exhibition on March 1 at 9.30 am. "We are grateful to Raj Nursing Home as they have been providing emergency medical

support to Vasantham's children over several years," said the founder of Vasantham.

"This year special demonstrations on yoga, first aid and how to react when someone has seizures will be conducted for the visitors. The models, experiments and activities to be presented on that day by our special kids will definitely engage and entertain the audience in a better way," assured Alli.
